

Jackass Blues (12 Bar Blues)

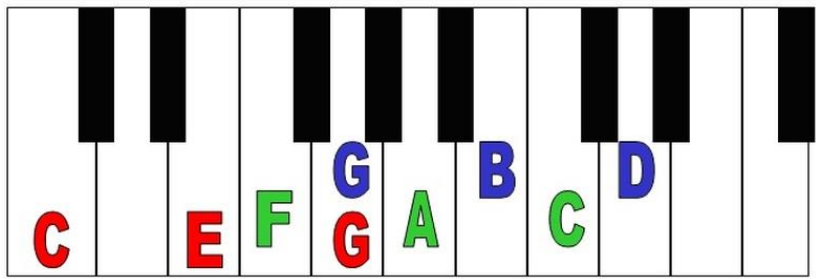

C C C C D C Eb D C

F C D C Eb D C

G F C G

Remember to count before playing the next part!

Chords need to be held for the whole bar in your left hand while playing the melody in with the right hand.

To play the chord, all three notes need to be played at the same time.

The colours on the 12 Bar Blues grid opposite match the colours for the Chords of C, F and G on the Ukulele.
Can you now transfer your accompaniment to the Ukulele?
